

Eastern Europe Tech Tour in Sofia

The first edition of the Eastern Europe Tech Tour in Sofia will take place on 12-13 of June 2018.

The Tech Tour initiative aims to discover local heroes in high-tech entrepreneurship. The region of Eastern Europe is realizing one of the highest economic growth and also is a hotspot for thriving entrepreneurial ecosystems that have generated \$5 billion in liquidity back to investors in the past few years. That's why this year Sofia is also on the radar of the initiative.

Entrepreneurial companies will present their business to an invited delegation of 40 international investors, active in the region as well as 40 local investors and regional key players.

The objectives of the Tech Tour are to identify the next wave of top privately held companies from the Eastern European Countries, as well as to promote investment and partnering by introducing a delegation of international investors and top European entrepreneurs to the key players in this region.
