

AIXaTECH selected for 1st EU-China Tech Scale-up Summit

May 2018

Dr. Volker Sinhoff is invited to speak at the «1st EU-China Tech Scale-up Summit» which will be held on 17 – 19 May in Chengdu, P.R. China. Moreover Dr. Volker Sinhoff will be joining the EU-China Cleantech Scale-up Delegation 2018 on 21-22 May in Wuhan.

The Summit is a VIP gathering of selected investors and scale-ups, meeting with leading local decision makers of VC and PE funds as well as chairmen of SOEs and private corporations, aiming at expanding EU companies in China and discussing co-investment opportunities between EU and Chinese investors. “We are proud to present the capabilities of our novel Low Temperature Epitaxy in the heart of the LED and high-power electronics market!” comments Dr. Volker Sinhoff this development and is satisfied with the selection of AIXaTECH as participant for this summit. “Our technology opens up the potential to achieve for the first time price parity between silicon and GaN in the field of high power electronics. We are therefore starting with the selection of strategic partners to fully exploit the game-changing potential of our technology in this multi-billion market.”
