Tech Tour to provide platform in London for European innovators in AI, Big Data, Security and IoT to meet international investors

By [Tech Tour](#) on October 2, 2018

188 views

The combination of home-grown talent, a technology ecosystem and end markets are transforming Europe into an international innovation hub for deep tech, and recently, London is the heart of this trend. Over the past several years, Europe has accelerated funding of domestic technology innovation. Venture capital investments in Europe grew significantly from €4.1B in 2012 to €19.1B in 2017, with deep tech funding rising even faster by nearly 10x over the same period. These significant investments create companies, keep talent local, generate returns, and most importantly, continue the virtuous cycle by spawning a new batch of start-ups.

Past ICT-focused editions of the Deep Tech Summit have helped presenting companies raise nearly EUR 124 million, with overall funding exceeding EUR 1.7 billion through the last 4 editions alone. Building on 11 previous successful editions in the sector, the **2018 Deep Tech Summit**, happening on the 9-10 October, will focus on digital technologies including AI, Big Data, Security and IoT.

The Summit will unite 100+ investors and corporate players with scale-up pitches from 23 growth and 10 emerging companies disrupting the digital industry. The Summit will open with a welcome from Rajesh Agrawal, Deputy Mayor of London, highlighting London as an important ecosystem that can continue in this role even after Brexit, where technology transcends politics. Bruno Maisonnier, CEO and Founder of AnotherBrain will enlighten the audience during a fireside chat “From Robotics to Self- Learning: The Future of Artificial Intelligence” using his experience from building success story Aldebaran Robotics which presented at a Tech Tour in the past.

Nish Kotecha, President of the 2018 Deep Tech Summit commented: “It’s a pleasure to support and lead the 2018 Deep Tech Summit in London at a time when the European tech community needs to come together to demonstrate that our European bridges are stronger than those of our political counterparts. Europe is at the heart of deep tech. Our start-ups today will become the economic engines for our future.”

Media representatives will receive priority access to tech company CEOs and investors at the Summit for editorial staff on the 10th of October, with the opportunity to set up interviews with speakers, and complimentary access to all sessions. Media representatives can register on the event’s **website** or at the registration desk onsite.

Registration for general participants interested in attending the 2018 Deep Tech Summit is still available up until the 9th of October 2018.
