

Organization	Country	Short Description	Stream
Applied Nano Surfaces Christian Kolar	Sweden	ANS is a leading technology provider of low friction and anti-wear surface treatment processes that help our customers to excel through improved product performance and reduced environmental impact. www.appliednanosurfaces.com	Industry, Energy Efficiency & Transmission
BroadBit Batteries David Brown	Finland	Breakthrough sodium-based battery innovations replacing and surpassing current lithium-based batteries in terms of cost, energy, power, longevity and environmental friendliness. www.broadbit.com	Energy Storage, Smart Mobility & Logistics
Collectric BV Himanshu Yadav	Netherlands	Providing charging services, solutions for debottlenecking of behind the meter energy distribution and car sharing services. www.collectric.com	Energy Storage, Smart Mobility & Logistics, energy generation
Coval Energy B.V. Frank Schreurs	Netherlands	Coval Energy is developing technological solutions for the re-use of CO2 to valuable products like formic acid and methanol. Our proprietary technology is based on an electrochemical process using renewable energy. www.covalenergy.com	Industry, Energy Efficiency & Transmission
CRESS Systems Richard Bradshaw	United Kingdom	CRESS Systems provides energy storage for high power heavy duty industrial applications; launching regenerative energy product in shipping industry. www.cress-systems.com	Energy Storage, industry
Fresh-r / Vaventis Jerom van Beuzekom	Netherlands	Fresh-r develops and markets the Fresh-r ventilation system, extremely well suited to create an healthy indoor air and at the same time reduce energy usage of the existing building stock of 221 Mio houses in Europe. www.fresh-r.eu	Energy Efficiency & Transmission
HYGEN Robert Strods	Latvia	HYGEN brings to the market a low cost supercharger that can fuel your Natural Gas Vehicle at home in just three minutes based on liquid piston gas compression technology. www.hygengroup.com	Energy Efficiency & Transmission
inalve Christophe Vasseur	France	Inalve produces microalgae-based ingredients for the aquaculture and the feed industry. www.inalve.com	industry
Qlayers B.V. Josefien Groot	Netherlands	QLAYERS develops an automated coating application method that enables to coat large industrial surfaces with a high coating speed and consistent quality. www.qlayers.com	industry, Energy Efficiency & Transmission, Smart cities

SOUNDENERGY Herbert Berkhout	Netherlands	SOUNDENERGY is bringing to the market the THEAC-25 a Thermo Acoustic Energy Converter which converts industrial waste heat or solar heat directly into usable cooling without the use of electric power, CO2 emissions, Maintenance and no use of polluting refrigerants. www.soundenergy.nl	Energy Efficiency & Transmission, Smart cities
Teraloop Philippe Pépin	Finland	Teraloop leads the development of next generation kinetic energy storage for the integration of renewables. www.teraloop.com	Energy Storage, industry, offshore, energy generation, Energy Efficiency & Transmission, Smart cities
